UNIQUE SOLUTIONS FOR UNIQUE CLIENTS

— LEAVE IT TO US! —

The Gillespie Group is a team of accountants and financial advisors who offer a wide range of expertise and experience in the world of business, taxation, wealth creation and finance. They are focussed and committed to providing the highest levels of personalised support to their clients and, like OPC, they understand that people and their businesses are unique and require timely and accurate solutions tailored to suit their individual needs. Their clients, like OPC's, come in all shapes and sizes.

OPC has been supplying the Gillespie Group with their hardware and IT support services since 1989. Our business philosophies are similar in that we understand that there is no such thing as one size fits all when it comes to financial services or IT. We are committed to excellence in our respective fields and believe that working in partnership with our clients is critical.

"Effective IT support is about understanding the business imperatives of an organisation and being flexible to meet those needs" said Brett Norton, Managing Director OPC IT

Being client-focussed requires innovation, flexibility and adaptability. In order to be able to provide its myriad of services to its multitude of clients, Gillespie's has relied on OPC to look after the information hub of its business – its IT infrastructure. OPC provides a tailored Managed Service Solution (MSS) to Gillespie's that ensures its internal operations and remote accessibility is performing perfectly at all times. Gillespie's have also engaged OPC's skills for several major infrastructure projects over the years.

"OPC has provided Gillespie Group with professional and reliable IT services for over 24 years. Without OPC's strong systems and support we would not be able to provide our clients with the high quality financial services we pride ourselves on" said John Gillespie, Principal Gillespie Group

Since 1985 OPC has become synonymous with the provision of the highest standards of technical services and provision of business solutions throughout Canberra and the surrounding regions.
