

## 'Safe, smooth and quiet, time and time again' OPC IT & WR Engineering

**W**R Engineering has been building garage doors and providing innovative home improvement solutions to Canberra homes and businesses since 1967. WR is a long-standing, trusted local business with uncompromising quality, continuous improvement and technology at the heart of its operations.

For WR, being Canberra's B&D Accredited Dealer makes them the 'go to' team for leading builders and professionals. B&D garage doors and openers, are strong, reliable, operate quietly and provide protection and security for your home. For doors that once required manual operation you can now control and monitor your garage door operations using your smartphone from anywhere you have access to a cellular or Wi-Fi network around the world. Touchscreen base stations and transceivers connect wirelessly to your home's Wi-Fi router and feature real time alerts, built in activity logs and you can set Pet, Parcel, Pedestrian and Ventilation modes!

But this technology still requires 'love' as Wayne Read, WR's owner and namesake, puts it! A garage door is probably the largest moving object in your home and the most used. To ensure optimal performance, regular servicing and monitoring is required to keep everything operating as it should and

to avoid potential problems. It's the same for WR's IT infrastructure.

'WR's and OPC IT's like-minded commitment to excellence sets us apart from our competitors and underpins our 13 year relationship' says Wayne. 'We have both built our businesses on well-established, quality brands and by staying at the forefront of ingenuity and latest technologies.'

OPC has been providing Managed IT Support for WR over many years. With regular scheduled visits and sophisticated remote monitoring toolsets, OPC provides WR with the peace of mind that, like their garage doors, their IT will 'operate safely, smoothly and quietly time and time again.'

OPC also believes in only providing the best of breed solutions for our clients and just as WR have invested heavily in B&D because of its unsurpassed backing and reliability, so too has OPC invested in Dell Solutions.

For complete end to end IT solutions OPC recommends Dell for its technology leadership, scalability, local support and warranty resolution timeframes that are always competitively priced.

OPC is a Dell Premier Partner and SonicWall Service Partner. We work with Dell to provide support across the ACT and surrounding regions and are able to leverage preferential pricing for our

clients on an ongoing basis as part of our relationship management.

'Both our organisations have been locally owned and operated and supporting Canberra clients for a very long time,' says Clinton Henderson, Technical Services Director of OPC. 'We are both very proud of our 'local roots' and are committed to providing the highest levels of service. We look forward to working together for many years to come.'
